

Large Scale sporting and entertainment events have come to a grinding halt as COVID-19 has disrupted a key element of our social fabric and mental wellbeing

But now...

Recent announcements, such as those from Qantas and the WHO, about exploring verifying customer health/immunization status before entry signals an accelerating trend towards proof-for-access. There is an urgent and growing need by all industries to adopt verifiable credentialing technology as a pathway to normalizing business.

IS YOUR BUSINESS READY?

Trybe.ID's **VenuePass** provides a solution that enables one's health status to be securely presented and verified, ie. COVID-19 negative, vaccinated, or similar thereby permitting safe entry to a venue. Trybe.ID VenuePass is a Digital Credentials platform that facilitates the **creation, issuance and presentation of verifiable credentials, ensuring data integrity and privacy are at its core.**

How it Works:

1. Event attendees and staff receive COVID19 vaccinations / tests from health care providers. They are immediately issued a Digital Credential to their Digital Wallet, likely on their phone, as proof of this.
2. Event venues request presentation of a Digital Credential proving vaccination or a negative COVID19 test within the past 24 hours to enter.
3. All event attendees must present a valid Digital Credential to be admitted into the venue.

Event Venues and Organizations may now resume Operations while:

Auditing attendees and verifiably prove compliance with health, risk and related governance frameworks or protocols

Creating secure and safe entry requirements which allow attendee and staff confidence and peace of mind

Enforcing strict entry requirements ensuring the safety of attendees

Trybe.ID is actively being utilized by over 30 issuing institutions globally, spanning 10 countries
